Unplug Status Report (Week 9: Oct. 23 - 29)

Update on Features, Milestones, and Deliverables (Kaleb Completed)

Deliverables

- Feature requirements document
 - Began this week on Oct. 27th.
 - Due on Oct 29th.
 - Status: Required section complete 

Milestones

- Beginning of research on extension-app infrastructure
 - Began two weeks ago on Oct 12th.
 - Completion date: Nov 12th.
 - Status: On schedule 
- Beginning of web extension development
 - Began last week on Oct 17th.
 - No completion date in sight.
 - Basic blocking functionality expected in coming weeks.
 - Status: On schedule 

Important Team Meetings (Kaleb Completed)

- Had fifth meeting with sponsor (10-24)
 - Discussed research on app-extension infrastructure
 - Discussed avenues of research worth exploring, such as using Firebase and Google publisher/subscriber relationships
 - Planned features of the extension we should focus on in the coming weeks
 - A storage solution for blocked websites
 - An actual blocking feature
 - Designs following Tim's plan on Figma
 - Discussed work split for the remainder of the week

- A strong preference towards completing paperwork first, and focusing full attention on the project next week.

Labor Completed (Biswas Completed)

Ian Rule

- Attended meetings and lectures
- Scheduling meetings and communicating with team members, sponsors, and the TA
- Some of their time went into the Project Status Report and Research
- Total hours: 7 hrs

Kaleb Pittman

- Attended meetings and lectures
- Created timesheet templates for team members as per TA's instructions
- Majority of time went into the Project Status report, taking care of documentation and research
- Total hours: 4

Biswas Gauli

- Attended meetings and lectures
- Some time went into the working on the extension and github work
- Majority time went into the timesheet and Project status report
- Total hours: 3.5

Nikita Feoktistov

- Attended meetings and lectures
- Majority of time went into the working on the extension and github work
- Some time went into the timesheet and Project status report
- Total hours: incomplete before the submission of this document

Issues or Risks Encountered (Nikita to Complete)

- Incomplete before the submission of this document

Changes & Plan for Next Week (Ian Completed)

Changes to Project Requirements

- We are prioritizing the completion of the “requirements document” and the “project plan document” over the next couple of weeks.
 - Biswas and Nikita will continue to work on the basic implementation of the browser extension if time allows for it.
 - Kaleb and Ian will continue to research cloud services and technologies we can utilize to integrate our browser extension with the current Unpluq mobile applications.
- Nikita will review the “catch up” section of our Asana task management page and complete the required tasks by the end of the semester.

Plan for Next Week

- Biswas and Nikita will present any progress they’ve made on the browser extension.
- Ian and Kaleb will present any progress they’ve made on their research.
- We will review the assignments for completing our “requirements document”.
- Sponsor meeting: Tuesday, October 31st at 8:00 AM.
- TA meeting: TBD
- Team meetings: TBD
- Project Requirement Document due Tuesday, November 7th after our sponsor meeting.
